

Saliva as a matter of teaching in the curriculum of Higher Education Institutions. Why and How?

AUTHOR: Prof. Lorena Franco-Martinez, PhD (Department of Animal Medicine & Surgery, Veterinary Faculty, , University of Murcia, Spain)

Collaborators:

Prof. Asta Tvarijonaviciute (Department of Medicine and Animal Surgery. Veterinary Faculty. University of Murcia, Spain)

Prof. Silvia Martinez-Subiela (Department of Medicine and Animal Surgery. Veterinary Faculty. University of Murcia, Spain)

DESCRIPTION

In this activity, the significance of saliva in Veterinary Medicine and Veterinary Curricula will be discussed. The significance of saliva as biological sample will be presented, with focus on their clinical applications in veterinary medicine. This information will be compared with the importance that is given to saliva in the Veterinary curricula, as well as its potential relationship with different subjects of the Grade.

STRUCTURE OF THE WORKSHOP (1 hours)

- Introduction (20 min)
- Examples in the veterinary curricula (10 min)
- Edu-saliva project presentation (10 min)
- Discussion (10 min).

DATE AND TIME: 7 th May 2025, at 14:00 pm

ISEAS

International Society of
Education in
Animal Sciences

PRICE: 5€ for ISEAS members

PLATFORM: ZOOM (link and password will be sent to participants' email before the workshop)
