

## Examination of domestic animal's semen – macroscopic, microscopic, CASA method

---

**AUTHOR:** Kinga Osemek DVM (Faculty of Veterinary Medicine, University of Life Sciences, Lublin, Poland)

Collaborators: Marco Wochnik, DVM; prof Roman Dąbrowski, prof. Leszek Krakowski, prof Marek Szczubiał, prof Piotr Brodzki, PhD, Tomasz Piech, PhD, DVM (Faculty of Veterinary Medicine, ULS, Lublin, Poland)

### DESCRIPTION

This workshop will introduce participants an overview of semen examination of different animals' species and show how it looks like step by step.

It will also show different methods of such an examination.

Semen examination is commonly divided into: macroscopic (organoleptic), microscopic (using Blom table or microscope slide) and additional tests, such as e.g. sperm concentration or motility of spermatozoa).

The presentation will also provide a brief information about more modern, reliable and advanced method – computer-assisted sperm analysis.

### STRUCTURE OF THE WORKSHOP (total 75 minutes)

1. Online presentation with photos (1 h)
2. Discussion and questions (15 minutes)

**DATE AND TIME:** 17<sup>h</sup> April 2024 at 3pm (exact date TBA on Facebook and Twitter)

**PRICE:** 5€ for ISEAS members
